

## subtle - Bug #100

### subtler -cCT and -cxT for xterm tags other/no xterm.

07/20/2009 01:24 PM - Thomas Dahms

<b>Status:</b>	Fixed	<b>Start date:</b>	07/20/2009
<b>Priority:</b>	Urgent	<b>Due date:</b>	
<b>Assignee:</b>	Christoph Kappel	<b>% Done:</b>	100%
<b>Category:</b>	Bugfix	<b>Estimated time:</b>	0.00 hour
<b>Target version:</b>			
<b>Description</b>			
Using subtler -cCT newtag or subtler -cxT newtag on an xterm should add the tag newtag to the focused xterm. However, another xterm is tagged or none at all. I will provide more details if I can narrow this down.			
Btw, this should be issue <a href="#">#100</a> , if nobody was in between. Yeah!			

## History

### #1 - 07/20/2009 02:23 PM - Thomas Dahms

OK, reproduction steps:

Case 1:

1. open one xterm (no rules, tagged default), this shows up in my view origin, to which default is assigned.
2. subtler -va test; subtler -ta test; subtler -v test -T test
3. subtler -cCT test
4. everything is fine, the xterm is on views origin and test, and subtler -cCG outputs default and test.

Case 2:

1. Like above but open two xterms.
2. as in case 1.
3. in the second opened xterm type subtler -cCT test
4. both xterms output default and test from subtler -cCG (which is unexpected), only the first shows in view test (which is also unexpected). No way to have the second opened on view test.

### #2 - 07/20/2009 10:13 PM - Christoph Kappel

- Category set to Bugfix
- Status changed from Unconfirmed to Feedback
- Assignee set to Non member users
- Target version set to 1
- % Done changed from 0 to 100

Issue fixed in #1281 - any feedback?

### #3 - 07/22/2009 07:24 AM - Christoph Kappel

- Status changed from Feedback to Fixed
