

subtle - Feature #110

Add an option to disable 'pointer follows gravity'

08/02/2009 06:35 PM - Ville Kovács

Status:	Fixed	Start date:	08/02/2009
Priority:	High	Due date:	
Assignee:	Christoph Kappel	% Done:	100%
Category:	Feature	Estimated time:	2.00 hours
Target version:	Xi		
Description			
If you use unclutter to hide the mouse pointer and switch between windows the pointer appears on the center of the window and then disappears again.

- Category set to Feature
- Target version set to 1

I tested this and it isn't so easy to archive. Just disabling the pointer movement will not work, my suggestions is adding an option to hide the cursor like with a grab. Hiding will mean I just replace the current cursor with an empty cursor and vice versa. Will also reduce the need of tools like unclutter.

What do you think about this way?

Applied in changeset [007340c8917c](#).

#5 - 11/18/2011 10:58 PM - Christoph Kappel

I changed my mind about that, pointer doesn't follow e.g. [gravity](#) changes anymore, when click-to-focus is enabled.
