<b>Description</b>			
<p>I have had varying issues with the notify sublet. First, on one install, it will not load and takes subtle down in the process, yielding something like the following: <a href="http://codepad.org/k5SgYzF8">http://codepad.org/k5SgYzF8</a></p> <p>On the second install, the icon doesn't even appear to show up, but that may be my fault.</p>
