Description			
NVidia Driver, command to enable the second display: xrandr --output LVDS1 --primary --preferred --output VGA1 --noprimary --right-of LVDS1 --auto			
Works, subtle relayouts, command to disable second display: xrandr --output VGA1 --off			
doesn't relayout, need to subtler -R. Worked in a previous version.			
Not really neccesary but comfortable.
