

subtle - Bug #239

Mplayer loses focus on view switch

07/22/2011 09:38 PM - Rasmus Steinke

| | | | |
|--|------------------|------------------------|--------------------------------|
| Status: | Fixed | Start date: | 07/22/2011 |
| Priority: | Urgent | Due date: | |
| Assignee: | Christoph Kappel | % Done: | 0% |
| Category: | Bugfix | Estimated time: | 0.00 hour |
| Target version: | Nu | | |
| Description | | | |
| if user switches views while (sticky) mplayer is active, mplayer will lose focus. | | | |
| 2 ways to see this: | | | |
| a) start mplayer, make it fullscreen, switch view, try to get mplayer into window mode again. (will not work until you switch back to the view where you started mplayer. | | | |
| b) start some app on workspace X. start mplayer on another view and switch to the view X again. mplayer will slip behind the started app. you dont even have to switch views. E.g.: Start thunar, start mplayer, open thunar preferences. mplayer will slip behind thunar. | | | |
