

subtle - Bug #241

floating windows are not kept on top.

08/02/2011 12:30 AM - Rasmus Steinke

Status:	Fixed	Start date:	08/02/2011
Priority:	High	Due date:	
Assignee:	Christoph Kappel	% Done:	0%
Category:	Feature	Estimated time:	0.00 hour
Target version:	Nu		
Description			
Maybe this behavior is desired, but i find it highly uncomfortable.			
Example: I watch an episode of some series and do some work in terminals at the same time. So i make my mplayer window sticky and floating and work in my terminals. Problem is, as soon as i have a terminal and mplayer occupying the same space, mplayer will not be kept on top of it.			
Reproducible like this: open some app and a floating app above it. now simply use mod+cursor keys to switch between those windows. This only seems to happen when changing windows with keyboard. Hovering the normal window with the mouse, or even clicking it, has no effect on the floating window.			
Result: floating window will move behind the normal window when the latter receives focus. Wanted behavior: floating window should stay on top, regardless of focus.			
Maybe there should be a seperate option that one can set on his/her floating windows to make them stay on top.
